Why Do People Want To Make Money?

Well isn't it obvious that we need money to survive? The reason is because we want to have more freedom, buy stuffs that we desire to have, enjoying life, go for holiday, relaxing, having a nice meal with our family, have more choices, have all the luxury life that all of us dream about, want to be famous and respectable, to help needy people, etc etc.

There are so many reasons that you can think of Why Do People Want To Make Money?

However those are not the answer for the real question here.

we need money because we have just lost our job. We want to make more money because we want to get out of the debt. We want more money because we hate our current job. We want more money because we do not want to work forever. We need money for our retirement so that we do not need to depend on social security. We want to make more money to help paying our tuition fee or for extra money while we go to school.

If you happened to fall in the above category, I understand how you feel. The answers that I provide were actually the problem of majority of people in the world which still goes on till today.

However today I am finally can taste a life again after several years of struggling because of no money. I feel that I am rebirth once more. I am finally free.

Maybe some of you are curious how I made it? How I can survive? How I can turn my life around again? How I, college drop out can earn money and I do mean lots of money and become free? I would like to share my happiness with all of you.

If you really want to make more money and want to enjoy your life, the only solution is to be your own boss. Stop becoming employee because you are killing your creativity for 8 to 10 hours every day. Imagine what your brain can think of creativity for 10 hours every day. How can you become free if you are always being told what time you must come to work and what time you can leave. How can you become free if you are always being told when you can have your Lunch!

I understand that all of you need financial security to pay for your bill and daily expenses. However, if you truly hate your life now, I suggest you to move on immediately. Stop arguing with your mind. You do not need to follow what your mind is saying to you.

Many successful people like Robert Kiyosaki (author of Rich Dad Poor Dad), T. Harv Eker (author of Secrets of Millionaire Mind), Donald Trump are millionaire and billionaire by doing business. Therefore I too suggest that You can

start your business now. If you can't, do it as part time. I know some of you may think that oh my god, I cant afford to start a business now as I do not have the lump sum of money. I only manage to pass by my day.

What are you thinking in your mind is absolutely WRONG You do not need a lot of money to start a business. Some even say that you do not need money to make money. However you still can start it small. In fact by reading my article, I am going to show you how to start a business with less than \$100. I am sure you can afford to fork out \$100 right? I did not say you throw away your \$100 or neither did I say to gamble and try your luck with \$100. What I need is only your commitment. If you commit to success, you will get success. That is the power of your mind.Simple.

The small investment of your money has the potential to grow to be Thousands, hundreds of thousands and even millions. Yes I said millions. I have the evidence. But this thing will only happen If only you know the formula on how to grow your money by creating successful business.

I am seeking your permission to please let me introduce you to the whole new satisfaction guaranteed and proven result program that could make you rich by\$1000 per day.

There is nothing wrong for you to try out things that could make you wealthier, since we only live once in this world.
